Experience

Data Analyst · Max Higbee Center

Bellingham, WA · 2023–Present

- Evaluated analytical methods and technical procedures to inform program development.
- Combined and linked data across disparate databases while maintaining confidentiality and security.
- Created data visualizations and presented findings to executive leadership, board members, and stakeholders.

Education

University of Washington

B.Sc. in Chemical Engineering · Minor in Data Science

Technical Skills

- Programming: Python, R, SQL, Bash
- Data Analysis: pandas, NumPy, Microsoft Excel
- Machine Learning: scikit-learn, XGBoost, PyTorch, TensorFlow/Keras
- Visualization & Reporting: Matplotlib, seaborn, ggplot2, Quarto
- Databases & Cloud: NoSQL, Azure Cosmos DB, Azure Functions
- Development & Computing: Docker, Linux, CRUD APIs, high-performance computing (HPC)

Selected Projects

Statistical Analysis of Northern Shrimp (*Pandalus borealis*)

University of Washington · Quantitative Science Course Project · Winter 2025

- Applied statistical methods to analyze northern shrimp survey data.

- Communicated findings through interactive HTML reports and PDF documents using R and Quarto.

Chemical Engineering Hackathon (C-Hack)

Dow Chemical Company & University of Washington · Winter 2022

- Cleaned and prepared real-world data using pandas.
- Applied dimensionality reduction and K-means clustering using scikit-learn.
- Created visualizations using seaborn to explore data and communicate findings.

Research & Technical Experience

Undergraduate Research Fellow (REU)

Molecular Engineering Materials Center (MEM-C), University of Washington · Summer 2021
Supported by NSF Grant DMR-179797

- Modeled vacancy diffusion in diamond using kinetic lattice Monte Carlo simulations.
- Communicated research methods and findings to a variety of audiences.

Chemical Engineering Study Abroad

Technical University of Denmark (DTU) · Lyngby, Denmark · Summer 2022

- Completed large-scale practical exercises in process technology and chemical unit operations.
